

Schedule A Central Arkansas Astronomical Society Eclipse Presentation to Your Group

The Central Arkansas Astronomical Society looks forward to sharing an Eclipse PowerPoint presentation to your group in Pulaski or surrounding counties. Given by CAAS volunteers, the program is for a general adult audience. It has a bit of history, the science of why the eclipse occurs, what to expect, and how to safely view the eclipse. The program lasts about 40 minutes, depending on how many questions and storytelling we get into.

Carl Freyaldenhoven is a retired science teacher and has been to six solar eclipses. He is an unapologetic eclipse enthusiast. Darcy Lee Howard is a retired science illustrator who also shares the excitement and beauty of eclipses.

If time and space allow, the volunteers will also bring a table display with a state map showing the path of totality across Arkansas, a display of safe solar viewers and DIY projects you can make to view the eclipse indirectly.

As the day of the eclipse gets closer, we will have more presenters around the state to give programs. Whether you are in the path of totality or not, you will want to know all about the eclipse!

To schedule a presentation to your group in Central Arkansas, please contact darcy.eclipse.CAASastro@gmail.com with the dates and times your organization is considering. In the meantime, clear skies and wide eyes!
