FIELDS Jackson County Crop Report

JACKSON COUNTY CROP REPORT | JACKSON COUNTY

NOTES

(1) Bollworm Moth Counts did fall off pretty significantly. there are worms in the fields. Pressure in the soybeans I've walked have been low. Highest counts are along edges where canopy isn't fully developed .Average last week was 2-4 worms per 100 sweeps.

(2) Make sure took look in Am or late evening. Hearing in places rice stink bug are flushing back into mature rice near 60% hard dough. If you have questions on maturity just call or send a picture.

(3) Still not see a large flush of stink bugs in the fields I am walking if you seeing something let us know so we can share. Averaged 2 per 100 sweeps in soybeans last week. I could find pockets of pressure but not county wide. In one area I did average 8 per 25 sweeps .

Jackson County Crop Report Observations

DETAILS	INSECT			WEED	OTHER
<p>Farm Jackson County</p> <p>Field Jackson County Crop Report</p> <p>Sizes 1.32 acres</p>	<p>Bollworms Low</p> <p>European Corn Borers ✓</p> <p>Southwestern Corn Borer ✓</p>	<p>Billbugs ✓</p> <p>Rice Stink Bugs Moderate</p> <p>Stink Bugs Low</p>	<p>Disease Target Spot- Light Pressure in R4/5 soybeans not anything really blowing up in the fields I scout.</p>	<p>Weeds ✓</p>	<p>Corn Most if not all corn should be at or near black layer after the rain we had we should be able to stop irrigation. If you're at 50% starch line with row water 75% with pivot plus adequate moisture</p> <p>Rice Rice is headed out. Stink bug pressure has been low to moderate. Have heard of a few consider spraying again. 60% hard dough for insecticide termination</p> <p>Soybeans Crops looks good this year most all soybeans minus wheat beans are at canopy.</p>

Cotton

Near calendar cutout. Influx of plant bugs near tree lines and Soybeans. Most cotton is at or near NAWF 5.
