FIELDS   Jackson County Crop Report

JACKSON COUNTY CROP REPORT | JACKSON COUNTY

NOTES

(1) Other crop Pressure in field is showing as corn matures. Beans and Cotton will be the next host crop. Hatches are occurring typically this week and next based on flight pattern and moth counts trending down this week. Average last week was 305 moths per trap

(2) Third Generation SWCB is trending down large flight was last week will continue to monitor until August 1

(3) Uniformity if rice heading is helping with rice stink bug pressure. Refer to mp144 expect reduce control from products like karate and if using tenchu or endigo make sure uniform heading has occurred to help protect the head with residual.

(4) Fields I am scouting pressure has been below treatment levels and we are just now starting to fill pods. Watch soybeans as pressure increases with brown/green stink bugs

Jackson County Crop Report Observations

DETAILS

Farm
Jackson County

Field
Jackson County Crop Report

Sizes
1.32 acres

INSECT

Bollworms
Moderate

European Corn Borers
✓

Southwestern Corn Borer
Low

Billbugs
Low

Rice Stink Bugs
Moderate

Stink Bugs
Low

Disease
Sheath Blight in rice is the one to discuss this week. photo credits to Issac Davis for the pictures. Use 2023 Rice Management Guide, Mp154, and call if you have questions.

WEED

Weeds
✓

OTHER

Nutrient Issues
✓

Corn
Moving along across the county. Most walked to day was at dent.

Rice
Fungicide timing for Blast, Smut, and Sheath Blight if you have questions call or review 2023 Rice Management Guide
https://www.uaex.uada.edu/farm-ranch/crops-commercial-horticulture/rice/2023%20Rice%20Management%2

Soybeans
Good looking crop some diseases showing up. Lower canopy disease are a concern after last week weather. Target Spot and Aerial Web Blight. Frog Eye Leaf Spot mid to upper canopy is another but review seed selection to check for resistance to frog eye leaf spot

Cotton
Plant Bugs Increasing. Square set looks good. Watch for square sheds related to nutrient deficiency
