

Sapium sebiferum

Chinese tallow*

Sapium sebiferum

Chinese tallow*

*Also known as: *Triadica sebifera*

Appearance: Deciduous tree to 16 m (52 ft), commonly to 10 m (33 ft). Sap milky.

Leaves: Simple, alternate; blades entire, broad ovate, 3–6 cm (1–2.5 in) wide, with broad rounded bases and tips that taper abruptly to a slender point. Petioles slender, 2–5 cm (1–2 in) long.

Flowers: Small, yellow, borne on spikes to 20 cm (8 in) long with 2–3 sepals (petals absent), 2–3 stamens or 3 styles (plants monoecious).

Fruit: A 3-lobed capsule, 1 cm (0.5 in) wide, turning brown and splitting open at maturity to reveal 3 dull white seeds, which remain attached for a time.

Ecological threat:

Tends to take over large areas; thrives in areas where the soil stays wet. Also found in upland, well-drained regions and in undisturbed areas such as closed canopy forests, in bottomland hardwood forests, shores of waterbodies, and sometimes on floating islands. FLEPPC Category I

Distribution: NW, NE, C, SW, SE
