The Arkansas Timber Price Report is a quarterly report of timber stumpage prices in Arkansas. Survey data for this report are provided by [Timber Mart-South](#). The price summary is provided to illustrate current, statewide market trends in timber product values for standing timber. These values may not reflect the stumpage values for a particular tract of timber. Timber prices may vary greatly depending on many factors including: location in the state, species, products, access, distance to mills, and site conditions. ## Time Series by Quarter Since 2015

**Trends:** Overall, stumpage prices decreased for all products in the 1<sup>st</sup> quarter of 2017. Pine pulpwood demand remains low, with stumpage prices ranging from 4 to 8 dollars per ton based on distance to a mill. Hardwood pulp prices resumed a slow downward trend. The market for hardwood sawlogs remained strong and was again reflected in the stumpage prices. The downward trend in stumpage pricing for this quarter was likely associated with increased supply due to the mild, dry conditions present for most of the winter.

Timber Mart-South has more detailed data available by subscription that contains products and regions not included in this report. TMS is compiled and produced at the Center for Forest Business, Warnell School of Forest Resources, University of Georgia, under contract with the Frank W.
