The Arkansas Timber Price Report is a quarterly report of timber stumpage prices in Arkansas. Survey data for this report are provided by [Timber Mart-South](http://www.timbermart.com). The price summary is provided to illustrate current, statewide market trends in timber product values for standing timber. These values may not reflect the stumpage values for a particular tract of timber. Timber prices may vary greatly depending on many factors including: location in the state, species, products, access, distance to mills, and site conditions.
