

# The Arkansas Timber Price Report

The Arkansas Timber Price Report is a quarterly report of timber stumpage prices in Arkansas. Survey data for this report are provided by [Timber Mart-South](#). The price summary is provided to illustrate current, statewide market trends in timber product values for standing timber. These values may not reflect the stumpage values for a particular tract of timber. Timber prices may vary greatly depending on many factors including location in the state, species, products, access, distance to mills, and site conditions. ## Time Series by Quarter Since 2015

**Trends:** Stumpage prices remained steady for most products in the 3rd quarter of 2017. Gains were experienced in both red and white oak sawlog values. A continued decline was experienced in hardwood pulpwood stumpage values. Pine pulpwood demand remained low. Housing starts continued their slow increase, up 3 percent from a year ago. The impact from the major hurricanes did not appear to affect timber prices in Arkansas.
