

The Arkansas Timber Price Report

The Arkansas Timber Price Report is a quarterly report of timber stumpage prices in Arkansas. Survey data for this report are provided by [Timber Mart-South](#). The price summary is provided to illustrate current, statewide market trends in timber product values for standing timber. These values may not reflect the stumpage values for a particular tract of timber. Timber prices may vary greatly depending on many factors including location in the state, species, products, access, distance to mills, and site conditions. Time Series by Quarter Since 2016

Trends: Stumpage prices remained steady for most products in the 3rd quarter of 2018. Strong markets remain in both red and white oak sawlogs, with AR running over 8 dollars per ton above the SE average. Pine pulpwood demand remained low, continuing to cause problems for non-certified, small-scale stands in need of thinning. Housing starts continued an upward trend nationally.
