

# The Arkansas Timber Price Report

The Arkansas Timber Price Report is a quarterly report of timber stumpage prices in Arkansas. Survey data for this report are provided by [Timber Mart-South](#). The price summary is provided to illustrate current, statewide market trends in timber product values for standing timber. These values may not reflect the stumpage values for a particular tract of timber. Timber prices may vary greatly depending on many factors including location in the state, species, products, access, distance to mills, and site conditions. ## Time Series by Quarter Since 2014

**Trends:** Overall, stumpage prices remained stable or increased for all products in the 4th quarter of 2016. Pine pulpwood demand remains low, with stumpage prices ranging from 4 to 8 dollars per ton based on distance to a mill. However, there is optimism for pine markets moving forward, with over 2 billion dollars in softwood mill infrastructure development planned in Arkansas since 2015. These investments are planned for new mills, mill upgrades and re-openings across the state. Hardwood pulp rebounded slightly. The market for hardwood sawlogs remained strong and was again reflected in the stumpage prices.
