

Potential Rain Garden Native Plant Selections for Northwest Arkansas

Plant natives! Native perennial flowers, grasses, and shrubs that prefer or tolerate moist soils should thrive in your garden. They'll also entice butterflies, hummingbirds, and other nectar and berry feeders to visit. These local plants tend to be well-adapted to a range of regional temperature and moisture conditions and will flourish without chemical fertilizers and pesticides.

* Can be found in Fayetteville Rain Gardens 🦋 Butterfly-Friendly H Butterfly Host Plant
