

White Rock

Date of Release - 2004; plant patent #17,911

Type - White, non-melting flesh, cling.

Fruit Maturity Date – June 25 first mature on average.

Fruit Size – medium, 140 g.

Skin Color - Red blush over 70% of skin with cream-like ground color; very attractive.

Flavor, Sweetness - Low-acid, light white peach flavor; sweet with average 12% soluble solids.

Fruit Firmness – Very firm, non-melting flesh that remains firm when fully mature to over mature.

Bloom Date - March 27 average full bloom.

Bacterial Spot Resistance – Moderate resistance, occasionally seen on leaves but no economic damage on fruits.

Comments - White Rock is a very productive, mid-early season, low-acid flavor white flesh peach for the fresh market. Shipping evaluations have not been made but should be suitable for transport.
