

2025 Soybean Research Verification Program Weekly Update May 16, 2025

Update No. 3

General	<p>By Chris Elkins.</p> <p>Rain continues to cause delays across the state. Jefferson county received the most rain with 1.10" and White County received the least amount of rain with .37". Weed pressure is picking up and herbicide applications are going out as weather allows. Disease and insect pressure remain low. Refer to table below for field specific information.</p>		
County	Variety	Stage	General Information
Arkansas 1	NK 42T5XF	V3	Received .73" rain, Excellent growth, field still wet with more rain coming, recommended 1 qt. Glufosinate 280L + 1 qt. Glyphosate + 3.25oz Zidua.
Arkansas 2			
Clay	Pioneer P48Z70BLX	VC	Received .66" rain, Almost V1, 1-2 acres on bottom end will require replants still has standing water.
