Update No. 16

General	<p>By Chris Elkins. Rainfall has been scattered over the past week. Clay County received the most rain with 1.2” and two counties received no rainfall. Arkansas 2 and Jefferson should receive final irrigation this week. Stinkbugs continue to increase in early planted fields but remain below threshold. Disease pressure continues to move slowly. Refer to table below for field specific information.</p>		
County	Variety	Stage	General Information
Arkansas 1	NK 42T5XF	R6	No rain, Late R6, Done, waiting on harvest.
Arkansas 2	Pioneer P49Z02E	R6	No rain, Almost R6.5, 13/25 Stinkbug brown and green mix, Fourth and final irrigation scheduled for 8/22.
Clay	Pioneer P48Z70BLX	R5	Received 1.2” rain, late R5 2/25 green stinkbugs, disease pressure remains low, fifth irrigation scheduled for 8/21.
Craighead	Asgrow AG47FX2	R5	Received .4’ rain. Early R5, Low insect and disease pressure, second irrigation 8/14. Third irrigation scheduled for 8/21.
Jefferson	NK 43-W1XFS	R6	No rain, 8/25 stinkbugs, low foliar disease, almost 6.5, good moisture.
Mississippi	Becks 4999XF	R5	Received .1” rain. late R5, Insect and disease pressure remain low, sixth irrigation 8/19.
Poinsett	Pioneer P48Z70BLX	R5	Received .68”, Steadily filling pods, Frogeye remains below threshold. Low insect pressure, sixth irrigation scheduled for 8/20.
Prairie	Pioneer P48A14E	R2	Received .13” rain, Good growth, Late R2, 3/25 Corn earworms, Virus working on Corn earworms, Good Grass control, Second irrigation scheduled for 8/20.
White	Pioneer P46A90LX	R7	Done, waiting on harvest.
Woodruff	Asgrow AG46XF3	R7	Done, waiting on harvest.
