

2020-21 Wheat Research Verification Program Fall Update

February, 2021

Update No. 3

General	By Chad Norton and Chris Elkins.
County Arkansas Ashley Chicot Clay Jefferson Lawrence Lee	<p style="text-align: center;">General Information</p> <p>The month of February kicked off with an arctic blast putting growth on hold for Arkansas wheat producers. Several inches of snow covered most fields in Arkansas and fields were unable to be accessed. Spring N application has been delayed until wheat fields start to green up. We expect wheat fields to have rapid growth once temperature increase. Overall we expect fields to recover quickly and do not expect to have a major impact on yield.</p>
