

Arkansas
ROW CROP VERIFICATION

**2020-21 Wheat Research
Verification Program Fall
Update**

April 16, 2021

Update No. 7

General	By Chad Norton and Chris Elkins. Cooler temperatures are expected to move in next week with lows in the upper 30's. We could see some slowed growth but no injury is expected at this time. Excellent growth was seen over the last week as we several fields start to head. Disease and insect pressure remains low.		
County	Variety	Feekes Stage	General Information
Arkansas	Pioneer P26R41	10.2	Started heading. Moving along.
Ashley	AGS 2055	11.1	13.7 oz. Miravis Ace applied 4-13 for scab preventative. Looks good.
Chicot	Pioneer P26R45	10.5.1	Started flowering. Should receive 8 oz. Prosaro application for scab soon.
Clay	Dixie Bentley	9	Should start to see boot split next week.
Jefferson	Local Seed LW 2848	10.3	Started heading. Prosaro application should be next week.
Lawrence	Delta Grow 1000	9	Excellent looking field, very uniform, very little disease pressure, should see boot split next week.
Lee	Local Seed LW 2848	10.5	Should start flowering soon.
