**ROW CROP VERIFICATION**

**2019-2020 Wheat Research  
Verification Program November  
Update**

**April 17, 2020**

**Update No. 8**

<b>General</b>	By Chad Norton and Chris Elkins. Wheat fields are progressing quickly as temperatures continue to warm up. Fields now range from starting to head through starting to flower. Insect pressure has remained low. A fungicide was applied to the Ashley County field to help prevent infection from FHB. Excess rain is still the biggest challenge to yields for the 2019-2020 season.		
<b>County</b>	<b>Variety</b>	<b>Feekes Stage</b>	<b>General Information</b>
Ashley	AGRIMAXX 473	10.5	Mid-flowering, Applied 8 oz/ac ProSaro on 4/15, water damage has had significant impact on field.
Lawrence	Dixie Brown	10.1	Starting to head, field progressing quickly, finally had a break from the rain.
