Crossvine, Bignonia capreolata

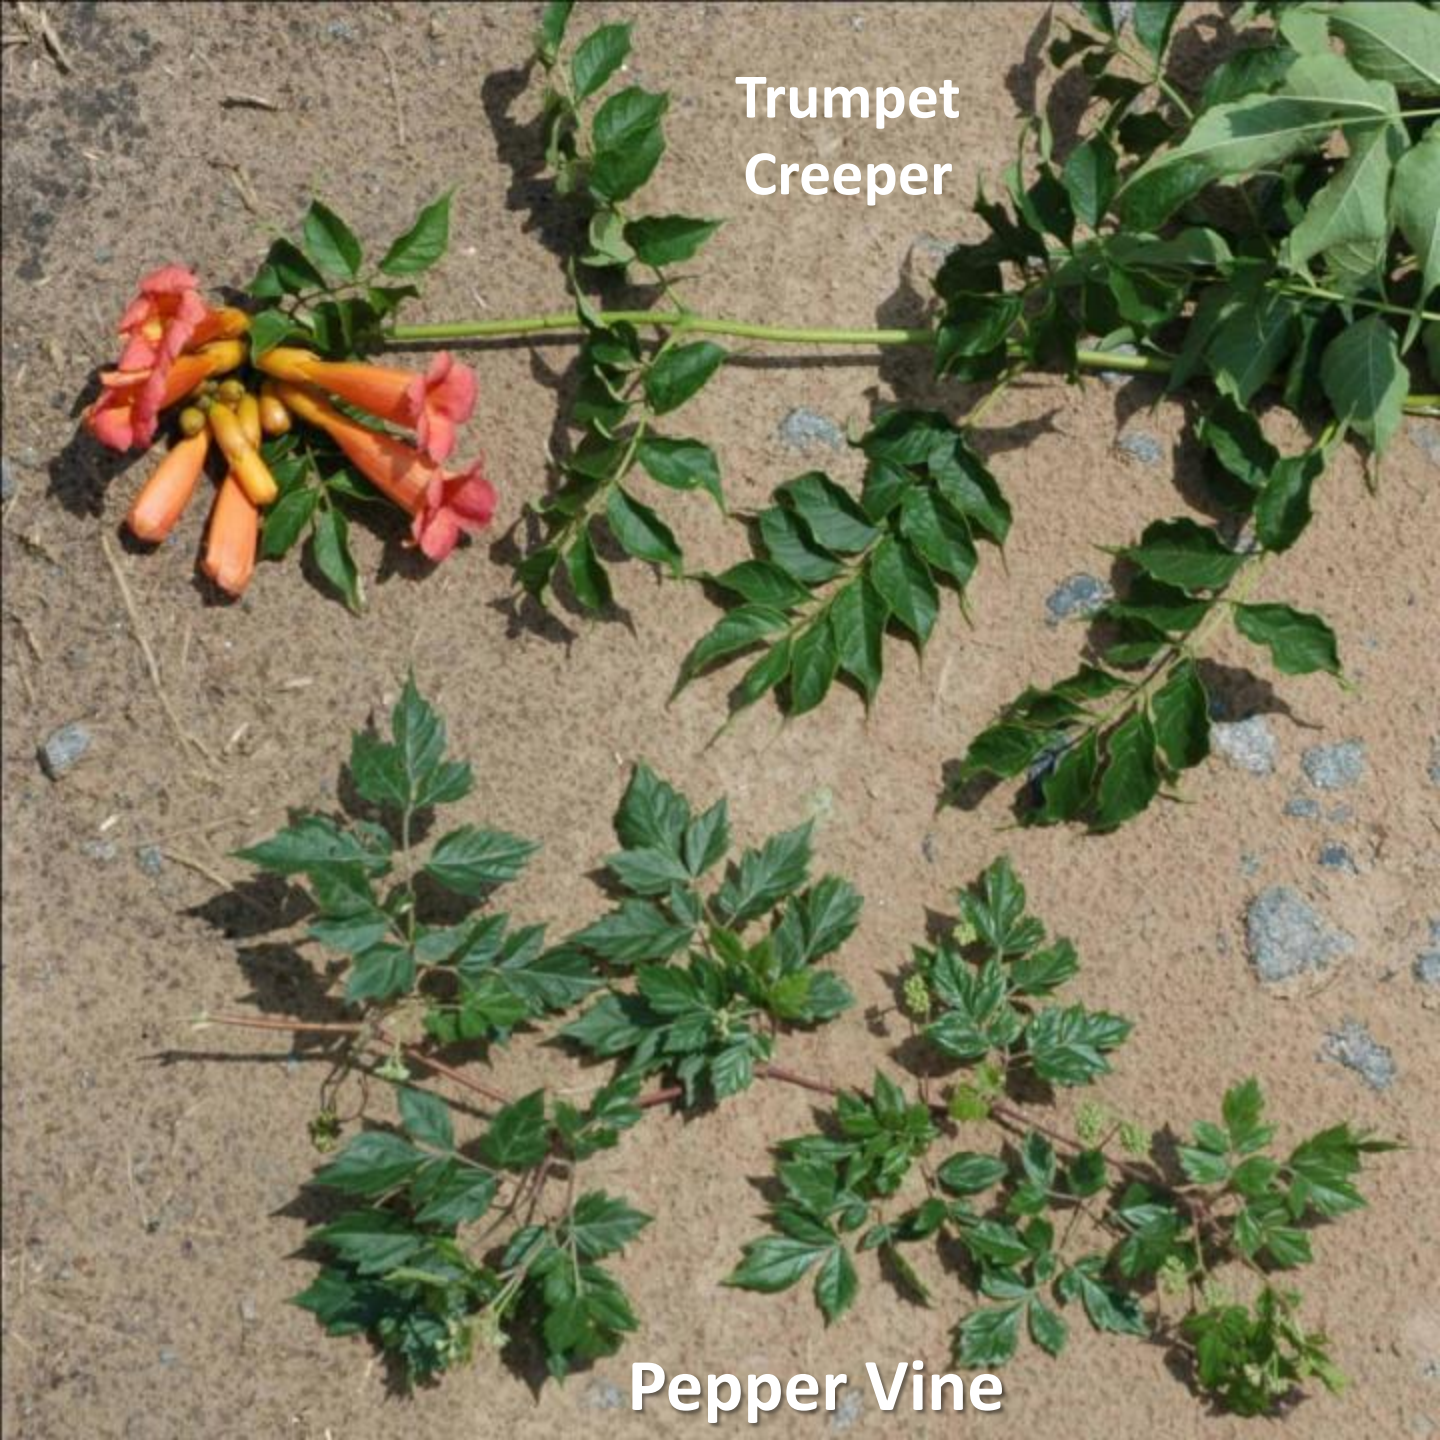

Trumpetcreeper, Campsis radicans

Trumpet creeper, Campsis radicans

A photograph showing two climbing plants on a sandy surface. The top plant, labeled 'Trumpet Creeper', has a long, thin stem with several green, pinnately compound leaves. At the left end of the stem is a cluster of orange, trumpet-shaped flowers and buds. The bottom plant, labeled 'Pepper Vine', has a similar stem structure with green, pinnately compound leaves, but it lacks flowers. Both plants are casting shadows on the sand.
