

MELTING CHRISTMAS TREE

Ingredients needed:

- Baking Soda
- Paper plate to make into a cone shape
- Vinegar
- Water
- Food coloring
- Glitter
- Bowl, spoon
- Squirt bottle/eye dropper

#1: Mix the baking soda, glitter, food coloring, and water into a glass bowl. TIP: Packable and moldable texture is wanted. Not runny.

#2: Make a cone out of the paper plate. I needed tape for this, but could easily be done without tape.

#3: Pack the mixture into the cone. Let freeze for 30 minutes.

#4: Have children pour, squirt, or drip vinegar onto the top of the 'tree'. Watch it begin to melt away!
