Food Label Inspectors Needed

Food labels help us compare and choose foods. They state where the food came from and how much food is in the package. The ingredient list tells us everything the food is made from. The food package also has a sell-by or a use-by date. This tells us how long it is safe to eat the food. The Nutrition Facts label tells us how many nutrients are in one serving of the food.

Let's practice reading food labels. Look at this Nutrition Facts Label from a yogurt container and answer the following questions:

1. What is the serving size of the yogurt? _____
2. How many servings are in the container? _____
3. How much protein is in one serving of yogurt? _____
4. How much calcium is in one serving of yogurt?
