Weed Control: G = Good      F = Fair \*\*\*      P = Poor      - = No data available

FS = Foliar Spray

BS = Basal Spray

CS = Cut Surface

ST = Soil Treatment

L = Labeled

N = Not labeled

\* Repeated herbicide applications over several years may be necessary for complete control of woody plants.

\*\* Basal soil or cut-surface applications only.

\*\*\* Fair = Partial control or defoliation.

Use this table as a guide for comparing the relative effectiveness of herbicides on individual weeds. Herbicides may perform better or worse than indicated due to extreme weather conditions and other variables. If you are obtaining satisfactory results under your growing conditions, changing products as a result of information in this table is not necessarily recommended.
