Rating scale – 0 = No Control 10 = 100% Control. Dash means insufficient data.

<sup>1</sup>Engenia/Xtendimax provide residual control under dry conditions, once rainfall occurs control is rapidly reduced.  
<sup>2</sup>Glyphosate-resistant populations of Palmer amaranth, horseweed and johnsongrass have been found in Arkansas.  
<sup>3</sup>Glufosinate in-crop rating on glyphosate-resistant horseweed is an 8.  
<sup>4</sup>Populations of Palmer Amaranth have been found resistant to herbicide modes of action 2, 4, 9, 10, 14 and 15.  
<sup>5</sup>Residual control only
