<sup>1</sup> Glyphosate-resistant populations of Palmer amaranth, horseweed, johnsongrass, giant ragweed, common ragweed and ryegrass have been found in Arkansas.

<sup>2</sup> Group 14 (PPO) – resistant populations of pigweed have been identified in Arkansas. Expect reduced control with most PPO herbicides containing flumioxazin (Valor), sulfentrazone (Authority) or fomesafen (Reflex) when used alone.

<sup>3</sup> Group 15 (VLCFA inhibitor) resistant populations of pigweed have been identified in Arkansas. Expect reduced control with most Group 15 herbicides containing S-metolachlor (Dual Magnum), acetochlor (Warrant), dimethenamid (Outlook), or pyroxasulfone (Zidua) when used alone.

\* Follow-up postemergence spray will be necessary to achieve these ratings.

\*\* Red rice ratings with Poast, Fusilade and Assure can be increased if repeat applications used.

\*\*\* Rhizome johnsongrass ratings with Treflan and Prowl increased to 7 if 2x rate used.

**Rating Scale:** 0 = No Control 10 = 100% Control  
Dash = insufficient data
