Small county. Big Vision: **Meet Your Host**

Greene County has a population of about 47,000 residents. Our Master Gardener Chapter has 45 members hailing mostly from the Paragould area, but also the small towns and communities within our county's borders, as well as some from neighboring counties.

The Greene County Master Gardeners became an official group in 1999 when 12 people were able to attend the classes and began creating our bylaws. Today we have almost quadrupled our numbers and those members have put in hundreds of hours tirelessly tending to their projects, attending conferences and classes, and winning awards!

Our membership may be on the small side, but our Northeast Arkansas community is full of volunteers, sponsors, and organizations willing to step up to make the next MG State Conference in 2027 one to remember!
