

Plant Health Clinic 2007 Summary Report

The Plant Disease Diagnostic Clinic in Lonoke received 3531 plant samples in 2007. The largest number of samples was ornamentals (52%) followed by field crops (26%) and vegetables (11%). Ornamental samples were boosted by 981 hosta samples from one nursery requesting virus testing. Numbers of field crop samples have significantly increased this year from 718 in 2006 to 910 in 2007. Turf samples remained like those numbers in 2006. The clinic continues to see an increase of homeowner samples from both landscapes and gardens.
